

Adobe® Acrobat® 7.0 Professional

Creating custom stamps

You can create custom stamps from PDF, JPEG, bitmap, Adobe Illustrator (AI), Adobe Photoshop (PSD), and Autodesk AutoCAD (DWL, DWG) files. When you select the file to be used for the stamp, you must create a category to store the stamp. If you want to add an image to a PDF document one time only, simply paste the image into the document. Pasted images have the same characteristics as other stamp comments; each includes a pop-up window and editable properties.

To create a custom stamp:

1. From the Stamp Tool menu on the Commenting toolbar, choose Show Stamps Palette.
2. Choose a stamp category from the pop-up menu at the top.
3. Click Import, select the file you want to use, and then click Select.
4. If the file has more than one page, scroll to the page you want, and then click OK.
5. Choose a category from the pop-up menu, or type a name to create a new category, name the custom stamp, and then click OK.

To edit a custom stamp:

1. From the Stamp Tool menu on the Commenting toolbar, choose Show Stamps Palette.
 2. Choose the stamp category, right-click (Windows) or Control-click (Mac OS) the stamp, and choose Edit from the pop-up menu.
 3. Edit the category or name of the stamp, or replace the image, and then click OK.
